### An Enthusiastic Reception.

The Opera House was packed almost to the doors Friday night by as select an audience as ever gathered there, to extend a welcome to James R. McCann, an old Paris boy, who has the leading part of "Maverick Brander" with "A Texas Steer" Company. When Mr. Mc-Cann made his first appearance the reception he met with was one which must have been pleasing to him. For at least five minutes he was unable to go on with his part, and then when he spoke his first lines, which were "What's the meaning of all this dracket?" the words were so appropriate that the audience again broke forth into applause. Mr. McCann is a splendid actor. The part which he is now playing seems to be peculiarly adapted to him, and he makes the most of it. He was supported by an excellent company. The citizens of Paris have every reason to be grateful to Mr and Mrs. McCann for their kindness in giving the benefit last summer in aid of the Public Library fund, and they showed on Friday night that they were not ungrateful. After the performance Mr. Mc-Cann and company were royally entertained by the Paris Lodge of Elks, with a banquet. Mr. McCann wishes the NEWS to express to the people of Paris his appreciations of their kindness.

## DESPERADO CAPTURED

Marvin Kuhns, Who Has Terrorized Northern indiana, in Jail.

Kuhns' Brother, Who Was Defending Him, Was Also Arrested-Prisoners Were Positively Identified.

Logansport, Ind., Jan. 18.-Marvin Kuhns, who has terrorized Northern Indiana for weeks and boldly defied the officers of two states, by a singular fatality finds himself in the Cass county jail in the very town in which he made such a desperate battle for life and liberty on the afternoon of December 10. Kuhns and his brother, who was released from the Columbus prison shortly after Marvin escaped, were taken after a desperate fight at Green Hill, a little town five miles south of Otterbein, west of Lafayette. Before the outlaw was overpowered he shot two men and was himself shot in the head.

Emboldened by immunity from officers, Kuhns and his brother and a confederate stole a team at Plymouth Sunday night and started south. Ex-Sheriff J. E. Marshall and Marshal T. J. Chaney traced them to Lafayette Wednesday evening, and by telephoning neighboring towns located the men at Green Hill, a small village near Otterbein. An Otterbein posse surrounded the house and rushed in at midnight. Marvin was awake, and seized a revolver at his bedside. Before he could fire Elmer Switzer shot him in the face and the posse closed in. One man jumped from the second-story window and escaped, but the brothers were overpowered after a struggle in which shots were exchanged.

Wounded as he was, Marvin partially shook off the attacking party and shot H. Volt in the back and Lewis Hawkins in the arm. Neither was fatally injured. The prisoners were brought to Logansport. Here Marvin was positively identified by the policeman who battled with him in December. His measurements and physical marks tally to a dot with the Bertillon description from the Columbus officials. He says if he had been given a fair show he would have cleaned out the posse. The wound in his face is not serious. The Plymonth authorities will likely prosecute him instead of returning him to Columbus.

Plymouth, Ind., Jan. 19 .- The two men in jail here were recognized as Marvin Kuhns, the desperado and escaped life convict from the Ohio penitentiary at Columbus, O., and his brother John. Kuhns was taken to the penitentiary Saturday. The Ohio officials came here for him. A reward of \$1,000 offered by the Ohio officials will be paid. He was recognized Friday by former neighbors at Albion. John Kuhns, the brother, will be held here and tried. A dispatch from Albion says Kuhns, his brother John and a cousin named Griffin left their home near Albion in a westerly direction Saturday evening after giving an oyster supper. Kuhns is a life convict for the murder of his partner 12 years ago, and for weeks has stalked abroad in this state defying the authorities.

### TERRIBLY TORTURED.

Burglars Compelled an Old Man to Tell Where His Money Was By Use of Red-Hot Pokers.

Shamokin, Pa., Jan. 18 .- Martin Reich, aged 62 years, who lived alone at his home here, was the victim of a brutal assault by masked burglars early Thursday morning, who also subjected Reich to frightful torture to induce him to tell them where his earnings were hidden. The burglars, five in number, overpowered the old man and applied red-hot pokers to his body and feet until he finally told them where the money could be found. This amounted to \$133.60. After dividing the money among them the burglars pounced upon Reich and kicked him until he was almost dead. They then made their escape.

### Killed By a Policeman.

Kansas City, Mo., Jan. 19 .- Frank Kester, aged 40 years, was shot and killed at his home here by Policeman Silas Shumate. Kester was intoxicated and was taken home by the policeman. He got a weapon, declaring that he was going to kill Shumate, and the officer, thinking his life was in danger, shot Kester. The dead man leaves a widow and three chil-

### LOST HIS MONEY.

N. H. Frazer Deposited \$500 For the Return of His Kidnaped Son, But His Boy Is Still Absent.

Atlanta, Ga., Jan. 21 .- N. H. Frazer, of Union Springs, Ala., whose son Bass was kidnaped several weeks ago while a student at the technological school here, has apparently lost \$500 by a decoy letter sent him. Mr. Frazer received a letter stating that if he would place \$500 in gold, the amount he offered for his son, in a sack with a peck of potatoes, and proceed along the road near the United States federal prison, several miles from this city, he would be met by a Negro who would ask: "Massa, has you got dem potatoes?"

He was to deliver the sack and its contents to the Negro and his son would appear at a hotel in this city looking for his father at an early hour Sunday morning.

The letter was signed "Packer," mailed in Atlanta, dated January 16, and the instructions were minute and Mr. Frazer's son, a brother of the

the letter, met the Negro as arranged and gave him the money and potatoes Saturday night. Sunday morning he was at the hotel mentioned and remained there all day, but Bass Frazer did not appear,

Count de Lubersac Wounded in the Arm By Baron Robert de Rothschild.

Paris, Jan. 21.—The long-expected duel between the Count de Lubersac and Baron Robert de Rothschild was fought with swords at 11 o'clock Sunday morning on Baron Edmond de Rothschild's estate at Boulogne Sur Seine. Count de Lubersac's seconds were M. Schege and Count de Laborde, and those of Baron de Rothschild were Baron Leonino and Viscount de Bondy. The duel began at 11 and lasted ten minutes, when Count de Lubersac received a lunge, perforating his arm at the elbow to the armpit. The duel was then stopped. Both the count and baron fought most determinedly; neither flinched and neither showed the slightest desire to spare the other. Sixteen engagements took place, all of a desperate character.

The combatants attacked each other furiously. The sleeves of their shirts were literally torn to pieces by the points of their swords as the duelists repeatedly lunged at each other. Several times they came to close quarters and their seconds were obliged to separate them.

### JOHN LEISENRING DEAD.

Well-Known Mine Owner and Former Congressman Passed Away in a Philadelphia Hospital.

Philadelphia, Jan. 21.-Hon. John Leisenring, the well-known mine owner of Luzerne county, and former congressman from the Luzerne district, died at the University hospital, this city. Mr. Leisenring had been a sufferer for a long time from heart and kidney trouble, and the latter part of December was brought from his home at Upper Lehigh, Luzerne county, to the University hospital in hope that he could obtain relief.

### Fight Declared Off.

San Francisco, Jan. 21.-The Mc-Coy-Sharkey fight, which was scheduled for next month in this city, has been declared off owing to the refusal of the board of city supervisors to grant a license to the Twentieth Century Athletic club for a fight in which McCoy was to be a principal. The club is now trying to match Root and Moffatt.

London, Jan. 24.—Throughout the United Kingdom there was a Sunday England outside the circle of the court knew the real condition of the queen or the nature of her disease. The bulletins threw but little light on the universal question whether death was imminent. The London newspapers had not learned that her majesty had suffered a shock of paralysis. Extra editions of the Sunday papers contained no information, but there were many of the official bulletins, and they were eagerly bought.

Crowds assembled to witness the arrival of Emperor William. Apart from such incidents, however, the customary quiet of a London Sunday was not disturbed.

### ACTIVE RECRUITING.

Is in Progress in All the Principal Cities-Enlistments Are For Three Years.

Washington, Jan. 19.-Active recruiting for the army is in progress In all the principal cities of the country. The authorized strength of the regular army at present is 65,000 men, and it is the intention to maintain it at that strength after the discharge of the 35,000 volunteers on June 30, next. All enlistments are for three years, and the number of recruits averages about 2,000 a month. Owing to the delay in action on the army bill, the impression prevails in the war department that it will be almost impossible to get all the volunteers to this country in time to permit their discharge here by June 30. In that case it will be necessary to discharge a number of them in the Philippines on that date, in order tokeep them there until replaced by regular troops now being recruited. Otherwise it would not be possible to keep the Philippine army up to the limit of 40,000 men, regarded asessential to the enforcement of the president's policy, while the proposed reorganization of the army is in. progress. It is said at the war department that, while it is settled that all the volunteers will be discharged June 30, the course of events in the near future will determine to a considerable extent whether the discharges shall take place in the Philippines or in the United States. Every effort will be made to get as many of them home as possible before their discharge.

"I think I agreed with you," said the priest, stroking his round, beardless face, while his gray eyes gleamed in the light of the fire.

en and society and, though and forcible, is, in effect, an acknowledgment that the question which the great poets of the past have at least stated in novel form are to be avoided as perplexing, if not insoluble, says the Hartford Courant. Much of it is description of natural objects, scenery, aspects of nature and the like, correct in form, but not suffused with feeling, which alone prevents descriptive poetry from being tame and prosaic. The whole seems devoid of energy, as if written to order and after a model. There is nothing that a reader cares to memorize or even cut out and paste in his scrapbook. The fatal lack of poetic energy, both of thought and expression, is everywhere apparent, evinced not only by the fact that the quatrains or sonnets to which writers confine themselves, though neat, antithetical and polished, are not striking. They lack the power to make us think, in most cases they lack the power to/hold our attention. They seem to be written from habit, not from the outburst of a slow-gathered impulse. They are usually glanced at and skipped by readers. As a rule they are good evidence in the affirmative of the question: "Has the age of poetical expression in

the English language passed?" All the verse in our modern periodicals has, however, one quality; it is correct. On reading 53 poems-or "bits of verse"-in the magazines of the month we find no straining of "poetic license;" only two instances of imperfect rhymes and only three or four instances of redundant syllables. The meter formula is carefully observed, misplaced accents are rare as strong, vigorous lines are. All is "splendidly regular, icily dull." The gayety and the seriousness are alike "machine made," and the lines in which they are embodied are sandpapered and varnished to perfection. The poet does not hum a tune carelessly like Burns or fervidly like Shelly; he plays his scales on a piano in perfect tune. May not this perfection be one of the reasons for the deplorable ineffectiveness of modern verse?

passed the experimental stage and bids fair to displace other systems for the illumination of passenger trains, on account of its cheapness and safety. It is the only absolutely safe method, since, in case of wreck, there is no inflammable material, such as gas or oil, to cause fire in the wreckage. At the same time, electric lighting from batteries fed by dynamos driven by the car axle has proved itself so cheap that in Austria, where the system has been worked out very fully, it is found that electric lighting is cheaper than cil, gas or candles .-N. Marriage in Hindoostan.

Marriages in Hindoostan are very simple and are usually arranged by the parents of the principals. When an alliance is agreed upon the bride and groom are brought together and perhaps see each other for the first time. The bride playfully skips toward him and seats herself beside him. The priest ties a corner of the bride's veil to the groom's shawl and this simple proceeding makes them man and wife .- Chicago Chronicle.

### THE POOR MAN'S SHEAF.

He saw the wheat-fields waiting All golden in the sun,
And strong and stalwart reapers
Went by him one by one.
"Oh, could I reap in harvest!"
His heart made bitter cry;

The traveler went his way,
Upon the poor man's threshold A golden wheat-sheaf lay.

In yesterday's issue of the Paris Gazette the editor took occasion to advise the people of Paris not to attend the performances of the Klimt-Hearn Company, which is now showing in Paris. Mr. Stitt has never seen a performance by this company, and knows nothing regarding their artistic ability. His only excuse, aside from malice, in roasting them is that we have had too many repertoire companies here this season. Mr. Stitt recently wrote an article roasting Mr. Clay Clement before he appeared here. ### WINTER BELLS.

When Winter wraps the world in white, And silent he the snowy dells, Tis sweet to hear amid the night The cadence of the fairy bells; They seem to set the winds astir With eerie music soft and low, And gently shake the modest fir Clad in its garb of spotless snow

They tinkle 'neath the watchful stars, Whose beams upon the whiteness fall, And as they near the meadow bars What recollections they recall! The trysting tree which Summer knows, . And clothes in hues of living green, Stands out against the sky and throws

Its lordly shadow o'er the scene. O Winter bells that tell of mirth! Thy music fills the heart with joy And makes a paradise of earth-A lovers' year without alloy; Across the fields there seems to come The music which of pleasure tells, And every hearth and every home

Rejoices at the winter bells. I hear them echo where the snow Lies softly on the frozen ground,

And where December's winds are low I list to catch their merry sound; A maiden at the lattice waits, For swiftly through the moonlit dells, Toward her heart's wide-open gates, A lover rides behind the bells. A lover rides behind the bens.

"If this isn't a case! Congratulations on my engagement! Now, shail go or shall I not? This hardly reads take cream or lemon in your tea?" like Chris. It's too gushing. She is more reserved. Perhaps her own engagement has changed her. I've neard of such things. I'll go.

'Wish I knew the man she is engaged to. Wouldn't I meet him cordially! I'd grip his hand until it would be useless for a month."

Worth Brice set his hat savagely on his head, tore a small note into a dozen pieces, threw them into an open grate and went out, locking his door with such force that the key was bent.

Ten minutes later Christabel Love was extending her hand to him in eather a constrained manner. There was an additional warmth in Worth's greetings because he had determined place. "If he was in such a pickle to carry the matter off without flinch-

"I've answered your congratulations in person, Chris," he began, in a jovial way, sinking into his favorite arm chair. "Your note broke in upon the most doleful reverie a confirmed old bachelor ever indulged in."

"There I sat," Worth went on, "my shows on my knees and my head in my hands, groaning over the prospect of full evenings soon to come, when you would be so deeply engaged in dressnot, that you wouldn't have time to see a fellow-'

"Dressmaking and letter writing-" Chris. interrupted, in a wondering tone. Her eyes had become large and round and a pucker appeared between her brows.

Worth laughed rather loudly, and slapped his knee, a thing Chris had never seen him do before.

"I'd just given up lamenting alone and decided to come and condole with myself in your presence when your note came-

Worth indulged in another mirthless laugh. Chris leaned forward and looked at him intently. The pucker had extended half way up her fore-

head. "Now, Chris, it's bad enough for you to go and get engaged, without putting up such a big bluff on me in that way." "Putting-up - a - bluff?" puzzled Chris, but the pucker began to smooth itself out. "So far you are an enigma to me."

Worth sighed. "Well, Chris, I suppose the Christian way to do would be to offer you both hours. hands and wish you all the happiness you'll be sure not only to get, but to give, that lucky fellow, whoever he is." Worth's voice was perilously near being shaky.

"Happiness I'll get and give." Chris was still following helplessly.
"When we meet," Worth went on, in his gayest tone, a trifle forced, "don't

be surprised if I give him the flat of my hand for depriving me of my best chum."

Chris leaned back and spoke reso-

"Worth, if you will be kind enough to explain yourself, I'll be copvinced, perhaps, of your sanity. Whom are you talking about, or don't you know your-

Worth became suddenly sober, as sober as he really felt.

"No, Chris, I don't know whom I'm discussing-that's the trouble-but it's engaged to."

"I engaged? That's news to me. Worth, your own engagement has affected your head as well as your beart-

But Worth did not wait for her to finish. He broke in eagerly, bringing Chris' cheeks. Mischief lurked in her himself forward in his chair with an leyes. Impetuous jerk.

"Say, now, aren't you, really, honor bright? I'm not, of course. How'd you hear? It's all a fake with me-

"A fake with you? Why, it came straight from Miss Maltby, this morning. She said she knew it.' "Miss Maltby go to-that is, I mean

told you that I-how did you get it into your head?"

"Why, through that man Truax. I'll interview him later on. But I have a curiosity to know the name of the individual Miss Maltby has bestowed my heart upon."

"And who," chimed in Chris, "does Mr. Truax expect will pay my millinery bills? If hats continue to be loaded with plumes, the man will be glad of an escape.'

Chris was conscious that this was an inane joke. Worth knew it, too. But

they laughed excitedly in chorus. "All Truax knew of your fance was that he is not a native of this town. Name was not familiar to him."

"And all that Miss Maltby was prepared to say, beyond the fact that you were soon to be married, was that the lady of your choice is red-headed," unconsciously raising her hand to adjust a stray lock of her own soft brown

"Let's ferret this gossip out," exclaimed Worth, in sudden inspiration. 'Let's confound the gossipers and get to the root of matters." "It's a bargain," agreed Chris. "We'll

follow the trail and report to-morrow night." The next evening the two met with unabated zeal although they had no

additional information to offer. "It's more difficult than I thought," reported Worth. "Truax sent me chasng after two or three men who are utter strangers to me, and who gave me \*\*\*\*\*\*\*\*\*\*\*\*\*\*\* more information than I was after-

"I believe it's snowing," she said, quite suddenly, in as surprised a tone is though the snow had not been falling steadily for four and twenty

"Yes, it is drizzling just a little," replied Worth, thoughtfully. He remembered that it had rained

the day before. At the same time he carefully removed a bit of snow from his trousers. Chris smiled and began boldly:

"Well, have you found out to whom I'm engaged?"

"Yes," said Worth, looking hard at her, "and have you discovered the unhappy girl who is to share my fu-

"As the result of my search," she began, "red hair resolved itself into a golden brown and the name 'Sever' has successively become Lever, Lover, and lastly just plain Love, with the first name Chris."

Then for the first time Worth looked up with a gleam of incelligence in his eyes. An intelligence which necessitated an hour's consultation. At the end of this time they had decided that it was not their Chris' laugh would have fallen on duit to explain to the world at large that the announcement had preceded the engagement by three days. OUR SWEAT SYSTEM.

Anywhere from Two to Twenty-Eight Miles of Sweat Glands on the Human body.

It may be interesting to know that one perspires more on the right side of the body than on the left, and that the skin of the palm of the hand excretes four and a half times as much proportionately to the surface as the skin of the back. The pores in the ridges of the palm number as many as 3,000 to the square inch. They are scarcest on the back, where there are only 400 to the square inch. These pores are not simple holes or perforations in the hide, as some imagine, but are little pockets lined with the same epithelium or pavement stuff that covers the exterior of the body. They run straight down into the deepest structure of the skin, and there they kink up and coil around till they look like a fishing line that has been thrown down wet. Inclosed in this knot are little veins that leak the perspiration through the walls of the tube, and it wells up to the surface of the skin. It is estimated that the average-sized man has 7.000,000 of these sweat glands, aggregating 28 miles of tubing. Think of it! Twenty-eight miles if all those tiny tubes could be straightened out and put end to end! These figures, wonderful though they may seem, are on the very best medical authority. They are the figures of men who have given their lives to the study of this subject. But still, if they seem too large to you, there is just as good medical authority for the statement that there are 2,400, 000 sweat glands on the human body. each one-fifteenth of an inch long, and that their aggregate length is two miles and a half! Think of it! Two miles and a half! If you object to that, too, I have the very best authority for the statement that they are one-quarter of an inch long and aggregate more than nine miles, or I can figure it for you at seven miles or 12 miles. Take your pick. Our motto is: "We aim to please." If one figure suits you more than another, it's yours. We can substantiate it by the very best medical authority, says Harvey Sutherland, in Ainslee's.

I find only one figure, however, for the amount of liquid secreted by the skin of an average person in a year though it is evident that the quantity must vary greatly according as the person works in an icehouse or rides a bicycle up-hill. From the average person in a year's time there oozes through the pores of the skin 1,500 pounds of water. Let us see: "A pint's a pound the world around," two pints make one quart, four quarts one gallon -oh, well, you cipher it out for yourself. I never was much of a hand at figures.

### CHANCE FRIENDS.

Possibilities of Congenial Companionship in Persons We Do Not Know.

It makes one homesick in this world to think that there are so many rare people he can never know; and so many excellent people that scarcely anyone will know, in fact, says Backlog Studles, by Charles Dudley Warner. One discovers a friend by chance, and cannot but feel regret that 20 or 30 years of life, maybe, have been spent without the least knowledge of him. When he is once known, through him opening is made into another little world, into a circle of culture and loving hearts and enthusiasm in a dozen congenial pursuits, and prejudices, perhaps. How instantly and easily the bachelor doubles his world when he marries, and enters into unknown fellowship of the to him continually increasing company, which is known in popular language as "all his wife's relations." Near at hand, daily, no doubt, are

those worth knowing intimately, if one had the time and the opportunity. And when one travels he sees what a vast material there is for society and friendship, of which he can never avail himself. Carload after carload of summer travel goes by one at any railway station, out of which he is sure he could choose a score of life-long friends, if the conductor would introduce him There are faces of refinement, of quick wit, of sympathetic kindness-interesting people, traveled people, entertaining people, as you would say in Boston, 'nice people you would admire to know," whom you constantly meet and pass without a sign of recognition, many of whom are no doubt your longlost brothers and sisters. You can see that they also have their worlds and their interests, and they probably know a great many "nice" people. The matter of personal liking and attachment is a good deal due to the mere fortune of association. More fast friendships and pleasant acquaintanceships are formed on the Atlantic steamships, between those who would have been only indifferent acquaintances elsewhere, than one would think possible on a voyage which naturally makes one as selfish as he is indifferent to his personal appearance.

Potash Soap for Eye Glasses. Constant wearers of eye-glasses, spectacles, etc., are much annoyed by the dimming of the glasses upon entering a warm room from a cooler place. It will greatly interest them to know that this evil can be obviated by rubbing the glasses with soft soap. All that is necessary is to rub every morning or before going out a little so-called green soap (washing soap, potash soap) over the whole surface of the glass, polishing it until it is bright again. The preparations. "Gasolin" and "Oculustra," offered for the same purpose at high prices, are nothing else than pure potash soap .-Die Werkstatt.

TAGGED FISHES IN THE SEA.

Some Things the Government Has Learned from Fishes That Were Marked and Came Back.

It seems rather an odd idea to fasten metal tags to marine fishes and then let them loose in the ocean with the idea of identifying them as individuals in case they happen to be caught at a future time; but this is what the United States fish commission is doing just now with cod, 1,500 of which have been duly tagged and released this year, says the Washington Times. No two tags are alike, the markings on them being stamped in a series of letters and numbers, record of which is kept in a book in such a manner that if a tagged codfish turns up a moment's reference to the memoranda will furnish the history of that particular specimen, with date of liberation, weight, and so forth. For example, a cod wearing a tag with the raised inscription "S 100" has a complete identification card, so that she cannot be mixed up with any other fish entered in the commission's ledger. Only "brood fish"-that is, spawnng females-are tagged. They are bought from fishermen, stripped of their eggs at Wood's Holl, Mass., and liberated in the waters of Vineyard sound, after having the tags attached

to them. The tag is a small piece of copper, securely fastened by a wire passed through a fin near its junction with the body. It does not matter which fin is chosen, though a back or tail fin is best. The tag is very light, and its attachment in the manner described does no harm whatever to the animal. During the last few months the fish commission has distributed a circular all along the coast of New England requesting that whenever a cod with a tag comes into the hands of a fisherman or other person he shall remove the piece of metal and send it to the commission station at Wood's Holl, together with a brief statement as to the date on which the fish was caught, where it was captured, its weight before dressed, its length and the condition

of its roe. The object of the tagging is to ascertain the rate at which a cod grows, the frequency of its spawning and the extent of its travels in the ocean. Knowledge of this kind has an obvious bearing upon fish cultural problems, and there is every reason to believe that the future of the cod fishery off the New England coast must depend mainly upon artificial hatching. The hatching of cod eggs and the planting of the fry in those waters has been carried on for several years, and already the fishery shows a notable improvement, apparently due to this work. During the present year, the work coming to an end April 1, there were planted in New England waters

250,000,000 codfish. This year the fish commission is going to bag many thousand of young salmon, artificially hatched for the Garibaldi's statement, must be a per rivers of the Pacific coast. Very small tags will be used, the fishes being "fingerlings," about three inches long. It is expected that in this way it will be ascertained the age at which the salmon come from the sea to spawn; also their rate of growth and the percentage of the fry that attain maturity. The work will be carried on in the basins of the Columbia and

Sacramento. Some years ago a similar experiment was made at the fish commission station on the Clackamas river, which is tributary to the Columbia; but, instead of tagging the young fishes, the soft dorsal fins were shaved off them with a razor before they were released. When they came back to spawn, three years later, they aver-

aged 20 pounds in weight. From this experiment one or two very interesting conclusions were drawn. If all of the artificially hatched fry had survived and been captured it is obvious that 1,000 of them would have contributed 20,000 pounds of food fish for market. As a matter of fact, only one out of ten of them returned and was taken, the result being 2,000 pounds of fish for every 1,000 young ones liberated.

Growth of Our Nails.

Finger nails and toe nails, being merely flattened growths of the same kind of cells that the hairs are made of, increase in about the same way, though their rate of progress has not been so carefully studied. Some say that the finger nails grow at the rate of one-thirtieth of an inch a week. Bean estimates that it takes 20 weeks to restore a thumb nail, and 96 weeks to restore a toe nail. I don't believe that. Once when I was about 16, and had less sense than most boys of that age, I bought a pair of boots too short for me. I were them, though they hurt me like sixty, and the first thing I knew the nails of my great toes came off. Well, I know that it didn't take any 96 weeks to make them good as new. Why, 96 weeks is two years, lacking not quite two months. Don't tell me .- Harvey Sutherland, in Ains-

### A NEW KING'S PLIGHT.

The Son of Garibaldi Says Victor Emmanuel III. Is in a Peculiar Position.

Ricciotti Garibaldi, who fought at the side of his father, the great Gen. Garibaldi, in the struggle for the liberation of Italy and in the Franco-German war, publishes an article in the North American Review, in which he explains the relative positions and aims of the monarchical and republican parties in Italy. The situation of the monarchy in Italy, according to Sig. plexing one, for the king cannot make friends of his enemies without making enemies of his friends. He says:

"If Victor Emmanuel III. remembers that, if he wears the iron crown, it is mainly owing to the popular elements -for history has revealed that the Piedmontese school of diplomats, with Cavour at their head, looked upon the struggle for the liberation and unity of Italy, rather as a means of aggrandizing the Piedmontese monarchy than as a realization of a high ideal, the reconstruction of a great nationality, of which, in fact, they were rather afraid -and if he exercises the strength of will he is said to possess to free his crown from the state of bondage in which it was under Humbert, and make it take its true position of mediator between the different political schools, using his influence and royal prerogatives in favor of those classes that most need comfort and guidance, the monarchy in Italy may yet have a long lease of life, for patriotism is a strong quality in the Italian heart, and he would find sincere, if unexpected, support from sources now hostile him and his crown. But, naturally, his bitterest enemies will then be those who have hitherto used the crown as an instrument to further their owr ends, and who, looking upon his child less condition as a danger to the monarchy, do not hide the possibility of his being replaced by some other member of his family. And it would be a curious thing if the anti-monarchists should one day be obliged to defend the crown acting on the principal that 'a devil you know is always better than one you don't know."

then, 'Hi," said Silas, as he pushed the checkers aside and gathered up the tablecloth on which they had been playing. "You see," he continued, turning to

the woman, "I lost my checkerboard the other day, an' Hi an' me 'lowed this tablecloth 'ud do fairly well for a substitute. Made it a leetle dirty, mebbe, but it'll all come out in the warsh. Only one in the store. Sixty-three cents. Wrap 'e- up?"-Indianapolis Sun.

AN ACCURATE DESCRIPTION.

It Was Made by a Trunk Owner to Satisfy a Curious Customs Official.

Here is a story that the ladies should appreciate. A young married woman who has many acquaintances in Cleveland took a little trip in company with hubby up to Montreal and back respectable looking individual, who offered for a modest consideration to says Youth's Companion. convey their trunk to the hotel. Never dreaming that a confidence man might be hidden beneath such a simple exterior, the husband closed the bargain and the couple wended their way to the hotel, says the Cleveland Post-Dispatch.

There they waited and waited for the trunk, which never came. Finally, the husband proceeded to the railway station and stated his trouble. The officials were sorry, but they could do "My niece," said the doctor, "has nothing. Just about that time his eye caught sight of the missing baggage. He told the railway men so. They were very sorry again, but the claimant would have to identify the property in a manner entirely satisfactory to the officials. The claimant remarked that he had the key in his pocket. Wasn't that proof enough? The officials shook their heads. There were keys and keys. A key didn't signify much. What was in the trunk? The husband asked them to wait

a moment while he sent a messenger for his wife. She would know the contents to the uttermost piece.

The lady soon appeared and the husband stated the case to her and tossed the key to the waiting officials. "Tell these gentlemen what is in our

trunk, my dear," he said.

"In our trunk?" she echoed. "Yes, my dear. You can tell just exactly what's in it because you packed it."

"Of course I can," she cried. "Let me see. Why, there's-there's," her face brightened, "there's my best And even the sober Canadians

AN AWFUL CALAMITY.

Brought About by What He Should Have Regarded as Good Fortune.

"It came out as I journeyed on horseback through Dakota that almost every settler's land was under mortgage," said a westerner, relates the Washington Post, "and one day when I came upon a pioneer seated on the grass by the roadside with a troubled look on his face. I asked him if it was the mortgage he was worrying about.

"'Wuss than that, stranger,' he replied as he looked up wearily. "'Sickness or death in the family?"

"'Wuss than that.' "Then it must be a calamity, indeed. You didn't lose family and home by a prairie fire?'

Nope; but you are right about its being a calamity. I've been trying to think of that word for two hours past, Yes, sir; you can put it down as an awful calamity.' "'But won't you explain,' I persisted.

"'I will, sir. Thar was a mortgage on the claim, and I was feelin' as big as any of my neighbors and takin' things easy when my wife was left \$600, Stranger, dare I tell you what she did with that money?'

"'She didn't lose it?'

"'No, sir. She jest paid the mortgage, bought two horses and a plow, and this mornin' I was bounced out of my own cabin bekase I wouldn't peel off my coat and go to work! Yes, sir, you are right. It's a calamity-a calamity that's landed me on the outside, and between my durned pride and her blamed spunk somebody'll be eatin' grass afore Saturday night!"

QUINCE ICED PUDDING.

Directions for Making a Dessert Dish That Is Extra Good.

This pudding consists of a mold of sponge cake, very much like that used for charlotte russe, filled with ice cream after being spread with quince jelly on the inside, says the New York Tribune. It is served heaped with whipped eream, with a wreath of whipped cream around it. To make the pudding beat three eggs light, and add a cup and a half of powdered sugar, and beat the whole until light and fluffy. Sift two cups of pastry flour with a teaspoonful of cream tartar and hall a teaspoonful of soda. Stir in half a cup of water in the beaten eggs and sugar, add the flour, and beat in quickly. Bake the cake in a sheet. Wher it is done let it become cold, then split it, and line a two-quart charlotte russe mold carefully with the cake. Spread the cake with a tumbler of quince jelly and fill the cavity with ice cream flavored with vanilla or caramel. Set the cake in a very cold place if it is to effect. A stole is, of course, a piece wait at all, so that the cream will not that passes over the shoulders and falls melt. FACTS ABOUT CORNS.

Their Formation and the Best Means of Eradicating the Painful Annoyances.

A corn is an overgrowth of the horny layer of some portion of the skin of the foot, induced by friction or undue pressure in one spot by the shoe. It is situated generally on a prominent pornot long ago. When they reached that | tion of one of the toes, more commonly bustling city they were approached by the little toe, but may be on the sole of the foot or even on the ankle bone,

It begins by an increase in size of the papillae in the deeper part of the skin, and this induces an increase in the production of the scarf skin, or horny layer. The scarf skin soon becomes inordinately thick, and, the pressure from the shoe continuing, is pushed back against the enlarged papillae, causing their final atrophy.

This formation of a corn affords a curious illustration of the defeat of nature's well meant efforts to prevent trouble; for the increased thickness of the horny layer is intended to afford protection to the enlarged and tender papillae, a purpose which would be well accomplished did the process stop there. But the friction by the shoe keeps up the irritation, and more and more of the horny covering is manufactured, until, instead of affording protection, it is actually the cause of all the pain.

After a time the spot where the corn s seems to acquire a bad habit, and the formation of the corn will go on even after the offending shoe has been discarded.

The first thing to do for a corn is to get new shoes that are so snug as not to rub the foot anywhere, and so loose as not to make pressure in one spot more than in another.

The top of the corn may be pared with a sharp knife, extreme care being taken-especially in the case of the aged-not to cut the sound skin; or it may be filed down to the level of the surrounding skin; or the entire corn may sometimes be loosened with a dull knife-blade or by the finger nail, and extracted from its bed.

When this cannot be done, removal may be facilitated by moistening the corn every other day with glacial acetic acid, the softened part being subsequently scraped away with a dull knife. or a small file. A salve containing salicylic acid, applied every night, will also frequently loosen the corn so that it can be pulled out. This is the basis of many of the popular corn plasters.

A soft corn, which is merely a corn that is always moist on account of its location on the inner surface of one of the toes, should be treated by keeping a piece of absorbent cotton between the toes so as to prevent maceration, and by bathing it frequently with strong alum water.
